

# Outdoor Solar Wall Light with Motion Sensor

This outdoor solar wall light provides energy-efficient illumination for various outdoor areas. It uses an integrated solar panel to charge its battery during the day and automatically lights up at night, also featuring a motion sensor.

## ADDITIONAL IMAGES

## Product Overview

### Smart Solar Lighting Solution

This outdoor solar wall light provides high-efficiency illumination for pathways, gardens, and patios without the need for complex wiring. Featuring an integrated photovoltaic panel and advanced motion-sensing technology, it optimizes energy usage by automatically adjusting light levels based on activity. Its durable construction and adjustable installation angles allow for versatile mounting on various vertical surfaces to suit any outdoor security or aesthetic requirement.

## Technical Specifications

### Lighting Modes

- Mode 1: Energy-saving motion detection
- Mode 2: Constant dim light with motion trigger
- Mode 3: Full brightness on motion

### Key Features

Motion Sensor, Solar Powered, Weather Resistant, Adjustable Angle, Easy Installation

## Performance

### Efficiency Metrics

**1**

Low Light Attenuation

**3**

Available Lighting Modes
