

Outdoor VHF/UHF TV Antenna

This outdoor TV antenna receives over-the-air broadcast signals. Its design includes dipole, reflector, and director elements for enhanced VHF and UHF signal reception.

Product Overview

Professional Grade Signal Reception

This outdoor TV antenna is engineered for high-performance reception of both VHF and UHF broadcast signals. Its robust multi-element design incorporates precise dipole, reflector, and director configurations to maximize signal clarity for over-the-air channels. Built with weather-resistant materials, this antenna ensures reliable performance and durability in demanding outdoor environments.

Technical Specifications

Structural Components

- Dipole elements
- Reflector elements
- Director elements
- Integrated balun transformer

Frequency Compatibility	VHF, UHF
Impedance Matching	Yes

Installation and Environment

Weather Resistance

All-Weather Design • Outdoor Rated

Mounting Options	Mast or pole mounted
Connection Interface	Coaxial cable
