

Outdoor VHF/UHF TV Antenna

This multi-element TV antenna receives terrestrial television signals. Constructed from light-weight aluminum, it is designed for outdoor use, optimized for VHF and UHF frequencies, and includes a mounting bracket.

Product Overview

High-Performance Outdoor TV Reception

This professional-grade outdoor TV antenna is engineered for superior terrestrial signal reception, covering both VHF and UHF frequency bands. Utilizing a combination of Yagi-Uda and loop element geometry, it provides excellent gain and directivity to maintain clear broadcasts in weak signal environments. Its lightweight aluminum construction ensures long-term durability for outdoor installations while maintaining ease of mounting.
