

Outdoor VHF/UHF TV Antenna

This outdoor TV antenna receives over-the-air broadcast signals. Its multi-element design enhances signal reception.

Product Overview

Professional Grade Signal Reception

This outdoor VHF/UHF TV antenna is engineered for high-performance reception of over-the-air broadcast signals. Featuring a multi-element design with precision dipoles and reflectors, it ensures stable signal acquisition across both frequency bands. The durable metal construction, crafted from high-quality aluminum, guarantees long-term weather resistance even in challenging outdoor environments.

Technical Specifications

Frequency Bands	VHF, UHF
Construction Material	Aluminum

Installation and Design

Mounting Options

- Mast mounted
- Support structure compatible

Design Geometry	Multi-element array with central boom
