

Outdoor Wall-Mounted Thermometer

This thermometer is designed for outdoor use in gardens and greenhouses. It features a temperature scale ranging from -30°C to 50°C and is encased in a white plastic housing for easy temperature reading.

Product Overview

Reliable Outdoor Temperature Monitoring

This wall-mounted thermometer is designed for precise ambient temperature monitoring in outdoor settings, such as gardens, greenhouses, or patios. Constructed from durable PS material, it offers a clear and easy-to-read scale for quick temperature checks. Its compact design makes it an ideal solution for various environmental monitoring needs.
