

# Oval Sharpening Stone for Blades

This oval sharpening stone is designed for honing and maintaining the edges of tools and blades. It is constructed from durable abrasive material, offering efficient and consistent sharpening.

## Product Overview

### Professional Sharpening Solution

This oval-shaped sharpening stone is expertly designed for honing and maintaining precision edges on a wide variety of tools and blades. Featuring a durable aluminium oxide construction, it provides consistent and efficient performance for high-demand workshop environments. The versatile oval geometry facilitates easy handling and effective sharpening across diverse blade profiles and sizes.

## Technical Specifications

Abrasive Material	Aluminium oxide
Grit	120
Shape	Oval

## Usage Characteristics

Applications	Tool maintenance, Blade honing, Edge repair
