

Over-Ear Headset with Microphone

This over-ear headset has an adjustable headband and cushioned earcups. It is designed for communication and audio applications, featuring a flexible microphone boom and in-line volume control.

Overview

Professional Communication Headset

This over-ear headset is engineered for clear, consistent audio performance in professional and communication-focused environments. Featuring a comfortable, adjustable headband and cushioned earcups, it is designed for extended wear during long calls or meetings. The integrated, flexible microphone boom ensures precise voice capture, making it an ideal solution for office, customer service, or remote work applications.
