

Over-Ear Stereo Headphones with Volume Control

These over-ear headphones deliver high-fidelity sound with 40mm drivers and a wide frequency response of 20-23000Hz. They feature a built-in volume control and microphone for convenient communication.

Product Overview

High-Fidelity Audio Experience

These over-ear stereo headphones are engineered for professional audio performance, featuring a closed-back design that ensures excellent noise isolation. Equipped with 40mm neodymium boron ferrite drivers, they deliver dynamic sound pressure and a wide frequency response for clear, immersive audio reproduction. Designed for extended use, the headphones include an adjustable headband and padded earcups, making them a reliable choice for long-duration listening sessions.
