

Over-Ear Wired Headset with Cushioned Ear Cups

This over-ear headset features cushioned ear cups for comfortable listening. The wired design ensures a direct audio connection and the closed-back earcups minimize external noise.

Product Overview

Comfortable Audio Performance

This over-ear wired headset is designed for reliable and comfortable audio delivery. Featuring cushioned ear cups and a secure, back-bang design, it is built to minimize external noise while providing a stable fit for extended use. With a standard 3.5mm stereo plug, it offers broad compatibility with various audio devices, making it a versatile choice for personal listening and professional applications.
