

Overload Component Communication Cable

Communication cable designed for overload components, ensuring reliable data transmission. Features durable construction and secure connectors.

Product Overview

Reliable Communication Connectivity

This high-quality communication cable is specifically engineered for use with overload components, ensuring stable and reliable data transmission. Built to withstand demanding industrial environments, it features durable construction and secure connectors for long-lasting performance. It is an essential component for maintaining consistent system communication in critical applications.

Technical Specifications

Rated Voltage

450 V

Minimum Rated Voltage

750 V

Maximum Rated Voltage

Application

Overload Component Communication

Key Features

Durable Construction, Secure Connectors, Reliable Data Transmission
