Product Overview

High-Efficiency Gas Water Heater

This gas water heater is engineered with an oxygen-free copper tank to ensure efficient, safe, and reliable heating for residential shower applications. Designed for modern households, it features a constant temperature strong exhaust system and a digital interface for precise control. With integrated safety mechanisms, including overheat protection and flame failure detection, this unit provides a dependable hot water solution.

Performance Metrics

Hot Water Capacity

13 L/min

Capacity (t=25)

16 L/min

Capacity (t=25)

18 L/min

Capacity (t=25)
