

Ozone Air Disinfection Machine

This ozone air disinfection machine is designed for air purification and disinfection using ozone technology. It is suitable for use in various environments requiring air disinfection, such as automotive and industrial spaces.

ADDITIONAL IMAGES

Product Overview

Professional Ozone Air Purification

This advanced ozone air disinfection machine provides a highly efficient solution for sterilization and deodorization in various environments. By utilizing ozone technology, it offers a more thorough alternative to traditional methods like ultraviolet or chemical spraying, ensuring no secondary pollution. Designed for versatility, it is ideal for use in rooms, vehicles, and air-conditioning systems to create a cleaner, more comfortable atmosphere.

Technical Specifications

Ozone Output

2000 mg/h

Ozone Production

Power Requirements	220V / 50HZ / 60HZ
Power Consumption	100 W
Air Output	40 L/MIN

Physical Dimensions

Device Dimensions

Dimension	Value
Length	330mm
Width	220mm
Height	660mm

Net Weight	11 KG
------------	-------

Operational Features

Timer Range	0-60 minutes
Air Outlet Configuration	Single outlet
Key Advantages	Sterilization, Deodorization, No Secondary Pollution, Environmentally Friendly
