Product Overview

Professional Grade Air Purification

The MTS-001 series is a high-concentration ozone generating device engineered for robust air purification and disinfection. Utilizing advanced ozone generation technology and multiple protection circuits, this unit offers exceptional performance and longevity. It is an ideal solution for eliminating bacteria, viruses, and harmful gases like formaldehyde and xylene in environments such as food workshops, medical facilities, and cold storage.

Technical Specifications

Ozone Production

10 g/h

Ozone Output

Ozone Concentration	10mg-22mg
Rated Power	100 W
Power Supply	~220V/50Hz

Physical Attributes

Construction Material	201 Stainless Steel
Unit Dimensions	350 x 200 x 200 mm
Gross Weight	9 kg

Operational Details

Recommended Space Volume	50-100m3
Cooling System	Wind Cooled
Air Source	Air

Applications & Usage

Suitable Environments	Food Workshop, Medical & Health, Breeding, Cold Storage, Purification Workshop
-----------------------	--

Included Accessories

Package Contents

- Power cord
- Warranty card
- User manual
