

Packaged Refrigeration Unit

This packaged refrigeration unit is designed for industrial or commercial applications. It features a condenser coil with fans for heat rejection and an insulated enclosure.

Product Overview

Industrial Packaged Refrigeration Unit

This self-contained refrigeration unit is engineered for robust performance in demanding commercial and industrial environments. Featuring an integrated condenser coil, high-efficiency fans, and a durable insulated enclosure, the system is designed for quick and streamlined installation. Its base-frame mounting allows for versatile deployment across various cooling processes and storage applications.

Technical Specifications

Core Components

- Condenser coil
- Heat rejection fans
- Insulated enclosure
- Reinforced base frame

Application Compatibility

Commercial Cooling • Industrial Processing • Storage Facilities

Installation Type

Self-contained, Ready-to-mount
