

Packaged Rooftop Air Conditioning Unit

This packaged rooftop air conditioning unit provides efficient heating and cooling. It is designed for commercial and industrial applications.

Overview

Industrial Rooftop Climate Control

This packaged rooftop air conditioning unit is engineered for demanding commercial and industrial environments. Featuring a robust metal housing with integrated louvered panels, it ensures optimal airflow and durability in outdoor conditions. The unit is equipped with a high-efficiency top-mounted fan, specifically designed to provide reliable heating and cooling performance for large-scale facilities.

Technical Specifications

Suitable Applications

- Commercial Buildings
- Industrial Facilities
- Large-Scale Climate Control

Air Discharge	Vertical
Construction	Robust Metal Housing, Louvered Panels, Weather-Resistant

Performance Metrics

Core Functions

Heating • Cooling • Air Circulation
