

Packaging Container

This packaging container is designed for the safe and efficient transportation of goods. It features corrugated steel walls and doors mounted on a wooden pallet base for easy loading and unloading.

Product Overview

Industrial Packaging Container

This durable packaging container is engineered for the efficient transport and storage of goods in industrial environments. Featuring robust corrugated steel walls and secure doors, it provides reliable protection for your inventory during transit. The unit is mounted on a sturdy wooden pallet base, facilitating seamless loading and unloading operations with standard warehouse equipment.

Construction & Design

Wall Material	Corrugated Steel
Base Construction	Wooden Pallet
Key Features	Corrugated Walls, Pallet Base, Secure Doors, Industrial Grade

Operational Utility

Primary Applications

- Goods transportation
- Warehouse storage
- Logistics and supply chain
- Material handling

Loading Access	Open access with doors
