

Packaging Machinery

Packaging machinery automates the process of wrapping, sealing, and labeling products for distribution. These machines are used to improve efficiency and consistency in packaging operations.

Product Overview

Reliable General-Purpose Engine

This single-cylinder, air-cooled gasoline engine is designed for versatile applications, making it an ideal power source for generators, water pumps, and small machinery. Engineered for durability and ease of use, it features a robust 5.5 HP output and a dependable electronic ignition system. Its compact design ensures straightforward integration into various equipment setups.

Technical Specifications

Power Output

5.5 HP

Output

Model Designation

GX160 • KT160

Engine Type

Single-cylinder, air-cooled

Ignition System

Electronic Ignition

Features

Typical Applications

- Generators
- Water pumps
- Small machinery
