

Paddy Field Soil Tillage Machine

This specialized agricultural machine efficiently prepares soil for planting in paddy fields. It plows, tills, and levels the surface to optimize soil conditions.

Product Overview

Professional Paddy Field Tillage

This specialized agricultural machine is engineered specifically for efficient soil preparation in paddy field environments. It streamlines the planting process by effectively plowing, tilling, and leveling soil surfaces to create an optimal seedbed. Built for durability and ease of operation, this equipment helps farmers improve soil structure and maximize crop yields.

Technical Specifications

Model Identifier	1ZS-25
Core Functions	Plowing, Tilling, Leveling
Depth Control	Yes

Design & Build

Key Construction Features

- Robust frame design
- Powerful engine integration
- Rotating blades/tines system
- Adjustable depth control
