

Paddy Separator Machine

This paddy separator machine efficiently separates paddy in mixtures. It utilizes vibration and screening to sort paddy by size and density.

Overview

High-Efficiency Paddy Separation

The Paddy Separator Machine is a professional-grade agricultural solution designed for the efficient separation of paddy and brown rice. Featuring an advanced, compact structure, this equipment offers reliable performance and is engineered for ease of operation and maintenance. It demonstrates excellent suitability for various rice types, ensuring high-quality output and operational consistency in demanding agricultural environments.

Performance Specifications

Model Specifications

Model	Output (kg/h)	Power (kW)
GLCZ80*5	800-1000	1.1
GLCZ80*6	1000-1200	1.1
GLCZ100*5	1500-1800	1.5
GLCZ100*6	1800-2100	1.5
GLCZ100*8	2400-2700	1.5
GLCZ100*10	3000-3400	1.5
GLCZ100*12	3600-4000	1.5

Key Features

Machine Features

- Advanced technological performance
- Compact and space-saving structure
- Convenient operation and maintenance
- High compatibility with various rice types
- Optimized separation efficiency
