Product Overview

Professional Mixing Solution

This robust paint mixer is engineered for the thorough and efficient blending of paints, coatings, and various viscous materials. Featuring a durable high-strength steel construction, it includes a helical mixing head designed to ensure uniform consistency and prevent settling. The long, stable shaft allows for easy operation in deep containers, making it a reliable tool for both professional and DIY applications.

Technical Specifications

Material	High-strength steel
Finish	Corrosion-resistant
Compatibility	Standard drill chucks

Key Features

Performance Highlights

1 Efficiency

Uniform Blending

1 Grade

Corrosion Resistance

Mixing Head Type	Helical / Looped
