

Pan and Tilt Security Camera with Night Vision

This is a high-resolution pan and tilt security camera suitable for various surveillance applications. It features remote pan and tilt control and infrared LEDs for night vision, enabling round-the-clock monitoring.

Product Overview

Versatile Surveillance Solution

This high-resolution pan and tilt security camera is engineered for comprehensive surveillance in both home and office environments. With advanced remote control capabilities, users can easily adjust the viewing angle for broad area coverage. The integrated infrared LEDs ensure reliable 24/7 monitoring, providing clear visibility even in complete darkness.
