

Pan Head Machine Screw, Zinc Plated Steel, Metric Thread

This pan head machine screw is designed with a wide bearing surface and a low profile. It is suitable for fastening components in machinery and industrial applications.

Product Overview

High-Performance Pan Head Machine Screw

This metric-threaded pan head machine screw is designed for secure fastening in a wide range of industrial and machinery applications. Featuring a durable zinc-plated steel construction, it offers excellent corrosion resistance and reliability. The pan head design provides a wide bearing surface and a low profile, ensuring a clean finish and optimal pressure distribution.

Technical Specifications

Head Style	Pan Head
Thread Type	Metric
Material	Steel, Zinc Plated
Shank	Fully Threaded
