

# Pan Head Machine Screw

This pan head screw features a wide, slightly rounded head and a machine-threaded shank. It is designed to mate with pre-tapped holes or nuts for a secure fastening solution in various applications.

## Product Overview

### Pan Head Machine Screw

The Pan Head Machine Screw is a versatile fastener designed for secure and flush fastening applications. Featuring a wide, slightly rounded head, this screw distributes pressure evenly across the fastened material, effectively preventing surface damage. Engineered with a standard machine-threaded shank, it is ideal for use with pre-tapped holes or mating nuts in various industrial and mechanical assemblies.

## Technical Specifications

Head Style	Pan Head
Fastener Type	Machine Screw
Thread Pattern	Standard Machine Thread

## Material & Compatibility

### Best For

- Pre-tapped holes
- Mating with nuts
- General mechanical assembly

Material	Steel, Stainless Steel
