

Panel Cart Truck 1600 lb Capacity

This heavy-duty panel truck is designed for transporting large, flat materials such as drywall, plywood, and panels. It features a sturdy steel frame with a durable powder-coated finish and is equipped with four swivel casters for easy maneuverability.

Product Overview

Heavy-Duty Material Transport

This panel cart truck is engineered for the efficient transport of large, flat materials like drywall, plywood, and various panels. Built with a robust steel tubing frame and a powder-coated finish, it ensures durability in demanding work environments. Its compact design allows for easy navigation through standard doorways, making it an ideal solution for job sites and warehouses.
