

Panel Mount Analog Ammeter 0-20A

This analog ammeter is designed for panel mounting, providing a visual indication of current. It is built to comply with GB/T7676-1998 standards, ensuring reliability and accuracy in measuring alternating current (AC).

Overview

Professional Analog Monitoring

This panel-mount analog ammeter provides a clear, real-time visual representation of current trends, making it an essential tool for industrial and electrical monitoring. Designed for reliability, the unit features a robust construction capable of withstanding significant mechanical stress and environmental variations. It is engineered to comply with national standards, ensuring consistent performance for professional electrical systems.

Technical Specifications

Measurement Range

20 A

Max Current

Accuracy Class

1.5 Class • 2.5 Class

Standards

GB/T 7676.1~9

Frequency

50 Hz

Dimensions

Dimensions

Type	Size
Outline	48mm x 48mm
Portiforium	44mm x 44mm

Operating Environment

Temperature Range	-20 to +40 °C
Max Relative Humidity	85% (at 25°C)

Durability

Mechanical Resistance

- Withstands 30m/s² acceleration
- Impact frequency: 80-120 times/min
- 2 hours transport shock resistance

Damping Time	4 s
