

Panoramic Observation Elevator

This panoramic observation elevator is designed for commercial and residential buildings. It features a transparent cabin that offers passengers unobstructed views of the surrounding environment.

Product Overview

Panoramic Observation Experience

The 2800 Series Panoramic Elevator offers a premium transportation solution designed for both commercial and residential buildings. Featuring a fully transparent cabin, it provides passengers with unobstructed exterior views while allowing natural light to permeate the space. Built with advanced energy-efficient components, this system ensures a smooth, quiet, and architecturally enhancing riding experience.

Technical Specifications

Control Technology

- Microcomputer serial communication
- Variable voltage variable frequency (VVVF)
- CAN BUS interference-free control

Traction System

Synchronous Permanent Magnetic, Gearless Traction

Product Features

Key Highlights

Energy Efficient • Quiet Operation • Natural Lighting • Architectural Appeal
