

Paper Cutting Bottom Blade for Paper Machinery

This bottom blade is designed for paper cutting machinery. It ensures clean, accurate cuts and is manufactured from high-quality materials for durability and long-lasting performance.

Product Overview

Precision Cutting Performance

This precision-engineered bottom blade is specifically designed for integration into paper machinery. It ensures clean, accurate cuts across various paper types and thicknesses, effectively reducing the risk of tearing or uneven edges. Built for durability and long-lasting performance, the blade design promotes efficient paper handling and minimizes operational downtime.

Technical Specifications

Material Options

- 9 CrSi
- Cr12MoV
- HSS (High Speed Steel)
- Fine steel

Compatible Blade Types

Points paper blade, Dashed blade, Paper cutter

Application

Primary Applications

Professional Printing • Paper Processing
