

Paper Laser Cutting Machine

This laser cutter is a professional model designed for rapid paper processing. It excels in paper cutting and hole-drilling applications.

Overview

Professional Paper Laser Cutting Solution

This professional-grade laser cutting machine is specifically engineered for high-speed paper processing, including intricate cutting and hole-drilling operations. Designed for efficiency and precision, it features an advanced red spot positioning system and a stable linear guide rail to ensure consistent results. With its versatile file compatibility and offline processing capabilities, it is an ideal solution for packaging, printing, art, and decoration industries.

Technical Specifications

Compatible File Formats	PLT, BMP, DSB, DST, DXF
Platform Type	Honeycomb platform
Positioning System	Red spot positioning system
Data Transfer	USB interface with offline processing

Key Features

Key Performance Features

- Imported linear guide rail for stability and high precision
- Auto-supplyment for light declining to ensure uniform engraving
- High-grade laser tube with long-life focus lens
- Large memory capacity for multiple file storage

Applications

Target Industries

Paper-cutting • Art & Craft • Ornament • Packing & Printing • Decoration • Upholster

Applicable Materials	Paper, Double side tape, Card sheet, Corrugated paper, Kraft paper
