

Paper Machinery Component Funnel

This paper machinery component features a conical, funnel-shaped design. It is engineered for precise material handling within paper production processes.

Product Overview

Precision-Engineered Funnel Component

This paper machinery component funnel is designed for critical material handling applications within paper production lines. Featuring a robust conical design, it ensures consistent flow and structural integrity during operation. The component is engineered with precise dimensions to facilitate seamless integration into existing machinery setups.

Technical Specifications

Component Type	Machinery Funnel
Design Features	Conical Shape, Precision Engineered, Industrial Grade

Dimensions

Key Dimensions

Dimensional Parameters

Parameter	Description
D	Overall Diameter
d	Bottom Opening Diameter
h	Total Height
