

Paper Production Machine

This machine is engineered for continuous paper production. Its complex structure includes rollers, gears, and walkways for maintenance.

Product Overview

Industrial Paper Production Solution

This comprehensive paper production machine is designed for high-efficiency manufacturing, covering the entire process from the headbox to the rewinder. It is engineered to produce a versatile range of paper products, including fluting, test liner, Kraft paper, as well as writing and printing paper. The system features a robust, multi-level industrial design optimized for continuous operation and ease of maintenance.

Capabilities

Compatible Paper Types

Fluting, Test Liner, Kraft Paper, Writing Paper, Printing Paper

System Components

Process Scope

- Headbox
- Forming Section
- Press Section
- Drying Section
- Rewinder

Design & Safety Features

Multi-level Platform • Maintenance Walkways • Heavy-duty Metal Construction • Safety Railings
