Product Overview

High-Efficiency PAR38 LED Lighting

This PAR38 LED bulb is engineered to provide efficient and reliable illumination, consuming only 13 watts while delivering a powerful 1050 lumens. Designed as a direct replacement for traditional incandescent or halogen PAR38 lamps, it offers significant energy savings and a longer operational lifespan. Its robust construction and standard E26/E27 base make it an ideal choice for recessed lighting, track lighting, and outdoor fixtures requiring focused, high-quality light.
