

Parallel Shank Single Flute Countersink

This high-speed steel countersink features a parallel shank and single flute. It excels at deburring, chamfering, and countersinking holes in materials like steel, aluminum, and plastic.

Product Overview

Precision Single Flute Countersink

This high-speed steel countersink features a single flute design engineered for smooth, chatter-free cutting. It is specifically designed for efficient deburring, chamfering, and countersinking tasks. Its parallel shank ensures secure compatibility with a wide range of rotary tools, including drill presses and hand drills.

Technical Specifications
