

Parking Assist Sensor for RENAULT

This parking assist sensor is designed for RENAULT vehicles. It aids in parking maneuvers by detecting obstacles in close proximity to the vehicle.

Product Overview

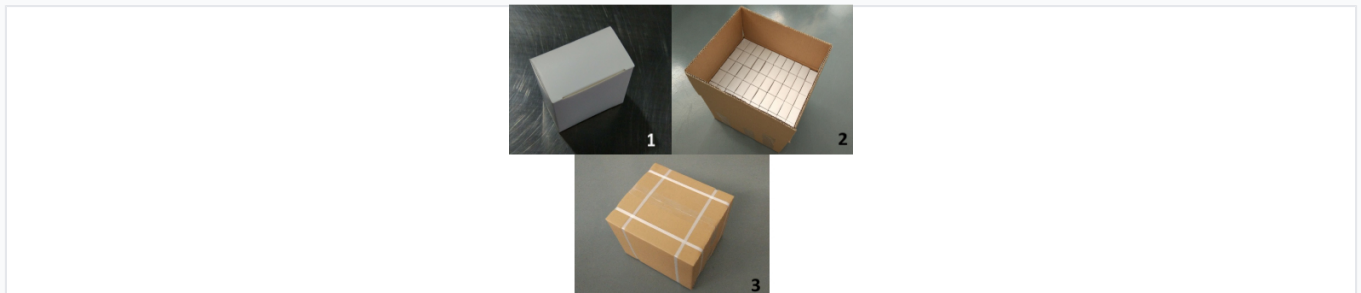

Ultrasonic parking assist sensor designed for reliable obstacle detection.

High-Performance Parking Assist Sensor

This ultrasonic parking assist sensor is engineered for precise obstacle detection during parking maneuvers. Designed for reliability and safety, the unit provides accurate distance measurements to assist drivers in navigating tight spaces. It is built to withstand rigorous environmental conditions, ensuring consistent performance over time.

Technical Specifications

The sensor is shown as a standalone component and securely packaged for transportation.

Part Number	284420001R
Sensor Type	Ultrasonic Parking Assist

Quality & Compliance

Certifications demonstrating adherence to international quality, environmental, and safety standards.

Standards Compliance

- Environmental Management System
- Occupational Health & Safety Management System
- Product Safety Compliance

Certifications

IATF 16949:2016, RoHS Directive 2011/65/EU, CE, IP67

Testing & Durability

Comprehensive testing facilities ensure durability against dust, water, humidity, vibration, and corrosion.

Environmental Testing

- Sand and Dust Resistance
- Rain/Water Resistance
- Constant Humidity and Heat Stress
- Mechanical Impact Testing
- Vibration Operational Testing
- Salt Fog Corrosion Resistance
