

Passenger and Commercial Minibus

This minibus is a versatile vehicle used for passenger transport and commercial purposes. It features a high roof and a sliding side door.

Overview

Versatile Transport Solution

This high-roof minibus is engineered for reliability and adaptability in both passenger and commercial operations. Designed with a spacious interior and convenient sliding side-door access, it provides an efficient solution for shuttle services and delivery transport needs. Its robust construction ensures long-term performance across a variety of professional applications.
