

Passenger Car Winter Tire

This passenger car tire is designed for optimal handling and grip in winter conditions. It features a tread pattern that provides excellent snow and traction drivability.

Product Overview

Winter Performance Engineered

This winter tire is specifically engineered to master challenging cold-weather elements, providing superior handling and grip for vans and passenger vehicles. Its design focuses on maximizing traction on snow and ice through advanced tread geometry and specialized rubber compounds. Built for durability and comfort, it ensures a smooth, quiet ride while maintaining high safety standards in winter conditions.

Technical Specifications

Size	215/65R16C
Load Index	107
Speed Rating	T

Features & Benefits

Deep V-type main grooves and zigzag shoulder grooves design

- Excellent snow and traction drivability

High sipes density

- Enhanced traction in winter conditions

Wider tread and large footprint for an increased tire contact area

- Enhanced ice traction performance and improved mileage

Optimised high dispersion silica compound

- Improved anti-skidding performance in cold weather

Detailed view of the V-type grooves and siping pattern designed for enhanced winter traction.

Design Features

- Deep V-type main grooves
- Zigzag shoulder grooves
- High sipes density
- Wider tread and large footprint
- High dispersion silica compound

Key Performance Metrics

100 % Snow Drivability	100 % Ice Traction	100 % Anti-Skidding Performance
