

Passive Keyless Entry System with Push-Button Start

This keyless entry system provides enhanced vehicle security and user convenience. It includes a push-button start/stop system along with remote controls for locking, unlocking, and car finding.

Overview

Advanced Vehicle Access and Ignition Control

This Passive Keyless Entry (PKE) system provides a seamless and secure upgrade for vehicle access and ignition. By automatically locking and unlocking doors based on proximity, it offers hands-free convenience for the driver. The integrated push-button start/stop functionality replaces traditional ignition keys, modernizing the driving experience while ensuring reliable performance.
