

Paving Machinery Metal Parts

Metal parts designed for paving machinery ensure reliable performance. These precision-engineered components are manufactured to meet stringent quality standards.

Product Overview

Precision Paving Machinery Components

These precision-engineered metal components are designed specifically for demanding paving machinery applications. Manufactured using advanced ODM processes, each part is crafted to meet stringent quality standards and ensure reliable performance in harsh construction environments. The components feature robust construction, precise dimensions, and durable materials, providing an extended service life for your heavy equipment.

Manufacturing Capabilities

Equipment Inventory

- HanKwang Laser Cutting Machine
- Koike Flame Cutting Machine
- AMADA Bending Machines (8T, 80T, 150T)
- AMADA Punching Machines (35T, 45T)
- Matsushita Welding Robots
- YH32-200A Hydraulic Press
- 4ASS Milling Machine
- QC12Y Shear Machine

Processing Methods

Sheet Metal Processing, Laser Cutting, Flame Cutting, Plasma Cutting, Mechanical Processing, Riveting, Welding

Facility Details

Facility Size

6500 sqm

Total Area

Annual Output Value

4000000 USD
