

PC Case for Enhanced Cooling and Expandability

This PC case is designed for optimal cooling and expandability. It features a robust construction with ample space for high-performance components.

Overview

Design and Utility

The 19 Series 1903 PC case is engineered for professional environments requiring optimal cooling and high expandability. Its robust construction provides ample space for high-performance components, making it suitable for both home and office setups. The airflow-focused design ensures efficient heat dissipation, maintaining system stability during intensive tasks.

Design & Build

Intended Use

Home Office, Professional Workspace, High-Performance Computing

Connectivity

Front Panel Connectivity

- USB Ports
- Audio Jacks

Expandability

Storage Support

Multiple internal drive bays

Motherboard Compatibility

Supports a variety of motherboard sizes

Performance Features

Cooling Efficiency

1 Optimized

Airflow Design
