

PC Case with Floral Design

This PC case is designed for housing computer components. It features a sleek design with a black and white color scheme and a floral pattern on the front panel.

Product Overview

Aesthetic Desktop Integration

The Silm Case S102C combines functional reliability with a unique aesthetic, featuring a distinct floral pattern on the front panel. Designed for versatility, this case accommodates both standard ATX and Micro-ATX motherboards, making it suitable for a variety of builds. Its durable construction ensures the safety of internal components while maintaining an organized and accessible layout for ports and expansion.
