

PC PP Flute Hollow Profile Sheet Extrusion Machine

This extrusion machine produces PC PP flute hollow profile sheets and boards. It features precise control systems ensuring consistent, high-quality output for various applications.

Overview

High-Performance Hollow Profile Sheet Extrusion

This advanced extrusion line is engineered for the efficient manufacturing of PC and PP hollow profile sheets. Featuring a specialized screw design and precise temperature control, it ensures stable, high-output production with excellent plasticizing. The system is designed for versatility, producing sheets suitable for advertising, soundproofing, packaging, and construction applications.

Technical Specifications

Maximum Sheet Width	2500 mm
Thickness Range	2mm - 12mm
Primary Applications	Advertising, Decoration, Sound-proofing, Packaging

System Components

Extruder Highlights

- Specialized screw design
- Advanced temperature control system
- High output capacity
- Stable plasticizing

Die & Calibration

- Super quality alloy die
- Adjustable restrictor bars for even pressure
- Adjustable lips for thickness control
- Dual independent vacuum subsystems
- Closed-loop vacuum regulation

Certifications & Compliance

Quality Standards

CE • ISO 9001 • ISO 14001 • OHSAS 18001
