

PC/104 Intel Atom N270 Single Board Computer

The PC/104 Intel Atom N270 SBC is a compact single-board computer designed for embedded applications. It features an Intel Atom N270 processor, providing efficient performance with low power consumption.

Overview

Compact Embedded Computing Solution

The PC/104 Intel Atom N270 Single Board Computer is an efficient, compact solution designed specifically for demanding embedded applications. Built on the Intel Atom N270 processor, it balances performance with low power consumption, making it ideal for space-constrained and rugged environments. With versatile display options including VGA and LVDS, along with essential connectivity like LAN and CompactFlash storage, it provides a reliable foundation for industrial automation and transportation systems.

Technical Specifications

Processor	Intel Atom N270
Form Factor	PC/104

Connectivity & Display

Display Interfaces	VGA, LVDS
Storage	CompactFlash (CF)
Networking	LAN Port
Audio	Yes

Applications

Target Industries

Industrial Automation • Transportation • Embedded Systems
