

PCBA Production Assembly Services

Assembly services are available for PCBA production. The facilities are equipped with advanced equipment ensuring high precision, stability, speed, and adaptability.

Overview

Professional PCBA Assembly Services

Our PCBA production assembly services offer high-precision, stable, and adaptable manufacturing solutions suitable for a wide range of electronic applications. Utilizing advanced automated and flexible assembly lines, we ensure efficient production processes with rigorous quality control. Our facilities include specialized environments such as 10K-class dust-free workshops, supporting large-scale production requirements for complex electronic devices.

Production Capabilities

Production Capacity Highlights

200000 units

Annual Car Audio Output

Production Environment

10K-Class Dust-Free Workshop, Automated Assembly Lines, Flexible Production Control

Industry Standards

Standards & Expertise

- Large-scale CKD production capability
- Digital projector national standards drafting unit
- Advanced American and Japanese equipment integration
