

PCD Concrete Grinding Cup Wheel

This PCD (Polycrystalline Diamond) cup wheel excels at material removal and surface preparation on concrete, stone, and similar hard materials. Strategically placed PCD segments maximize cutting efficiency, while the high-quality steel body ensures lasting durability.

Product Overview

High-Efficiency PCD Grinding

This PCD (Polycrystalline Diamond) cup wheel is engineered for aggressive material removal and precise surface preparation on concrete, stone, and other hard materials. Its robust design features strategically placed PCD segments that ensure maximum cutting efficiency and extended tool life. The high-quality steel body provides necessary stability during operation, while integrated vent holes facilitate efficient dust extraction and cooling to prevent overheating.

Technical Specifications

Compatible Materials

- Concrete
- Stone
- Hard Materials

Construction Features

- PCD Segments
- High-Quality Steel Body
- Vent Holes for Dust Extraction

Primary Applications

Grinding, Leveling, Coating Removal
