

# PCD Concrete Polishing Disc

This PCD (Polycrystalline Diamond) polishing disc is designed for concrete and stone grinding. It features PCD segments for material removal and holes for dust extraction and cooling.

## ADDITIONAL IMAGES

## Product Overview

### Professional Concrete Grinding Solution

This PCD grinding cup wheel is engineered for high-performance surface preparation on concrete floors. It features an aggressive design specifically optimized for the efficient removal of epoxy, vinyl, and glue coatings. With its anti-vibration connector and stable construction, it ensures consistent results while reducing operator fatigue during intensive grinding tasks.

## Technical Specifications

### Available Sizes

- 4 inch
- 7 inch
- 125 mm
- 180 mm

Material Composition	Metal and Polycrystalline Diamond (PCD)
Thread Options	22.23mm, M14, 5/8-11
Segment Count	2 to 8

## Performance Metrics

### Performance Highlights

**1 High**

Removal Rate

**1 Long**

Lifespan

### Applications

Concrete Grinding • Epoxy Removal • Vinyl Removal • Glue Removal

## Logistics & Availability

Lead Time	3-7 days after payment
Monthly Supply Capacity	30000 Pieces
