

# PCD Grinding Wheel

This PCD grinding wheel is designed for aggressive material removal and surface preparation. It features strategically placed PCD segments for efficient grinding and polishing of concrete, stone, and other hard materials.

## ADDITIONAL IMAGES

## Product Overview

### High-Performance PCD Grinding Wheel

This PCD (Polycrystalline Diamond) grinding cup wheel is engineered for aggressive material removal and professional surface preparation. Designed for durability and stability, it excels at removing epoxy, vinyls, glues, and concrete coatings. With an integrated anti-vibration connector and efficient cooling design, it offers a stable, long-lasting solution for both concrete floors and various stone surfaces.

## Technical Specifications

### Available Sizes

- 4 inch
- 7 inch
- 125mm
- 180mm

### Thread Options

- 22.23mm
- M14
- 5/8-11

### Material

Metal and PCD (Polycrystalline Diamond)

### Segment Count

2-8 segments

## Performance & Application

### Key Features

- Anti-vibration connector for reduced operator fatigue
- High material removal rate
- Ventilation/cooling holes for heat reduction
- Stable performance for extended lifespan

### Applications

Concrete Grinding, Epoxy Removal, Vinyl Removal, Glue Removal, Stone Polishing

## Compliance & Logistics

### Certifications

MPA • En13236 • SGS

### Production Lead Time

**3 days**

Minimum Lead Days

**7 days**

Maximum Lead Days
