Product Overview

High-Performance PCD Grinding Solution

This PCD (Polycrystalline Diamond) grinding wheel is engineered for aggressive material removal and professional surface preparation. It is specifically designed to handle challenging tasks such as removing epoxy, vinyl, and glue from concrete floors. With its robust construction and high-efficiency segment design, this tool ensures consistent performance, reduced vibration, and an extended service life for demanding industrial applications.

Technical Specifications

Thread Options

- 22.23mm
- M14
- 5/8-11

Available Sizes

4 inch, 7 inch, 125mm, 180mm

Segment Count

8 segments

Material

Metal and PCD (Polycrystalline Diamond)

Performance & Application

Applications

Concrete Grinding • Epoxy Removal • Vinyl Removal • Glue Removal • Surface Leveling

Key Advantages

- Anti-vibration connector for reduced operator fatigue
- High material removal rate
- Stable performance on various floor types
- Optimized for dust extraction and cooling

Logistics & Supply

Monthly Supply Capacity

30000 Pieces

Monthly Capacity

Typical Lead Time

3-7 days after payment
