Product Overview

High-Performance PE Braided Hose

This high-density polyethylene (HDPE) braided hose is engineered for demanding agricultural and irrigation applications. Featuring a robust braided construction, it offers superior resistance to punctures, tears, and abrasion, while remaining flexible for easy handling and installation. Designed for reliability, the hose is UV-resistant and chemically stable, making it an ideal solution for water transfer, irrigation systems, and chemical spraying in outdoor environments.

Technical Specifications

Available Diameters

- 2 inch
- 3 inch
- 4 inch

Material

High-density polyethylene (HDPE)

Key Features

UV-resistant, Chemical-resistant, Abrasion-resistant, Flexible

Applications

Primary Applications

- Irrigation systems
- Water transfer
- Chemical spraying
- Weed control
- Soil stabilization
