

Peanut Processing Machinery

This machinery is designed for processing peanuts. It efficiently handles shelling, sorting, and preparation tasks.

Product Overview

Professional Peanut Processing Solutions

This industrial-grade peanut processing machinery is designed to optimize efficiency in food production lines. Engineered for high-volume handling, it ensures consistent quality and throughput for unshelled peanut preparation. The system is built to maintain the integrity of the product while streamlining the sorting and cleaning processes.

Technical Specifications

Operational Metrics

98 %

Processing Efficiency

500 kg/h

Throughput Capacity

Handling Capacity

Unshelled Peanuts, Raw Agricultural Produce

Compliance & Quality

Certifications

ISO 9001 • CE Certified • Food Grade Compliant
