

Pedestal Ventilation Fan with Telescopic Stand

This pedestal fan is designed for refrigeration and ventilation applications. It features a circular fan head with a dense array of radiating blades and a telescopic stand.

Product Overview

Industrial Pedestal Ventilation Fan

This versatile pedestal ventilation fan is engineered for effective air circulation in refrigeration and general machinery environments. Featuring a high-density blade array and a robust telescopic stand, it offers adjustable height and reliable airflow performance. With multiple base configurations available, this unit provides the flexibility needed to meet diverse industrial setup requirements.

Technical Specifications

Available Models	YPF-10A, YPF-10B, YPF-10C
------------------	---------------------------

Design and Build

Base Options

- Circular White Base
- Circular Black Base

Telescopic Design	Yes
-------------------	-----

Application

Primary Applications

Refrigeration • Ventilation • General Machinery
