

Pelton Turbine Hydro Generator

This hydro generator features a Pelton turbine for efficient energy conversion in hydropower plants. It is engineered to harness the power of water and convert it into electrical energy.

Product Overview

High-Efficiency Pelton Turbine Generator

This Pelton turbine hydro generator set is engineered for optimal energy conversion in hydroelectric power plants. Designed to harness kinetic energy from water flow, this equipment offers a reliable and robust solution for diverse hydraulic conditions. It is part of a comprehensive package solution for design and E&M equipment, ensuring seamless integration into customized hydropower projects worldwide.

Technical Capabilities

Turbine Type	Pelton Turbine
Primary Application	Hydroelectric power plants
Key Features	Robust construction, Optimized hydraulic design, Reliable operation, Customizable solution

Global Reach

Countries Served

- Russia
- Belarus
- Nepal
- Indonesia
- New Zealand
- Peru
- Ecuador
- Chile
- Georgia
- North Korea
- Afghanistan
- Turkey
- Congo
